

Release my Granddaughter from Cygnet Private Hospital

My name is Gillian Speke. Please help release **MY GRANDDAUGHTER** from **CYGNET HOSPITALS** by signing our petition.

She needs to be near to her Nan. **8 YEARS** she has been incarcerated. Her physical & mental health have deteriorated, she has had no help from a Nearest Relative because this is being evaded. Her weight has doubled due to the long list of meds she is forced to take. She is confined to a secure Borderline Personality Disorder ward. She gets no fresh air or exercise, there is no structure, no organised activities except for Mindfulness & she has been denied access to education for the past **11 YEARS**.

She has not had an assessment for a move to the community as promised in 2016.

She is DYING in there. She does not deserve to be punished; she has committed no crime. She is a vulnerable woman who needs help for Trauma (PTSD).

PLEASE HELP GET HER OUT!

That is an even more ridiculous dosing regimen than I had ever seen. SSRI's with atypicals are totally rejected in the Maudsley prescribing guide and Mimms. Benzodiazepines and SSRI's and atypicals even more idiotic. What is the procyclidine for? there are no neuroleptics in that list that justify an anti-Parkinsonian agent.

Info taken from confidential reports to CPA meeting held 30/01/2017:

The drug caused excessive weight gain is Clozapine 225mg BD.

"Regular Medication:

Setraline 200mg mane
